PROFILE

Junior full-stack developer focused on building modern, production-ready web applications with React, Next.js, TypeScript, Supabase, and PostgreSQL. Experienced in developing responsive interfaces, authentication systems, relational databases, real-time features, AI-powered functionality, and client-facing web applications. Comfortable taking projects from concept and architecture through development, deployment, debugging, and iteration.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), SQL, HTML5, CSS3

Frontend: React, Next.js, App Router, Tailwind CSS, Responsive Design, Component Architecture, Client & Server Components, State Management

Backend & Data: Supabase, PostgreSQL, Authentication, Authorization, Row Level Security, REST APIs, Server Actions, Realtime Systems, Database Design

AI & Data Processing: AI SDKs, Gemini, OpenAI, Groq, Structured Outputs, Document Processing, OCR, Embeddings, RAG

Tools & Deployment: Git, GitHub, Vercel, VS Code, Figma

EXPERIENCE

Freelance Software Engineer — Buhle Bezwe Early Childhood Development Centre

2024 – Present | Next.js • React • TypeScript • Tailwind CSS • Framer Motion

- Designed, developed, and deployed a responsive website for an Early Childhood Development Centre, establishing its first modern online presence.
- Built a custom interface around the organisation's branding using reusable React components and responsive layouts.
- Developed interactive UI elements and animations while maintaining usability across desktop and mobile devices.
- Structured the application to allow future expansion into parent and administrative management functionality.
- Worked directly with the client to refine requirements, improve the user experience, and prepare the application for production deployment.

SELECTED PROJECTS

Academiq — AI-Powered Academic Workspace

Next.js • React • TypeScript • Supabase • PostgreSQL • Tailwind CSS • AI SDKs

- Designed and developed a full-stack academic workspace that centralises student modules, assessments, marks, academic timelines, calendars, and study workflows.
- Built an AI assistant capable of interacting with academic context and supporting students with questions, study assistance, and academic planning.
- Designed document-processing workflows for extracting assessment information from uploaded academic documents, including text extraction, OCR, structured parsing, and assessment-weight detection.
- Implemented Supabase authentication, PostgreSQL data models, Row Level Security, and application-level data access patterns.
- Integrated AI model providers and structured AI outputs to transform unstructured academic information into application-ready data.

- Built responsive dashboard, module, timeline, calendar, and assessment interfaces using reusable React components and Tailwind CSS.
- Designed the system with performance and database efficiency in mind, minimising unnecessary Supabase requests and separating application state from data that requires persistent fetching.
- Deployed and iteratively maintained the application using Vercel and GitHub.

Devfolio — Full-Stack Portfolio & Real-Time Visitor Platform

React • Next.js • TypeScript • Supabase • PostgreSQL • Tailwind CSS • Vercel

- Designed, developed, and deployed a full-stack portfolio platform with real-time visitor-to-admin messaging, authentication, presence tracking, and responsive interfaces.
- Implemented email/password and anonymous authentication flows secured through Row Level Security policies.
- Designed a relational PostgreSQL schema with real-time synchronized data models supporting messaging, chat updates, and visitor presence.
- Implemented a Supabase Edge Function to securely validate administrative access codes while keeping privileged verification logic server-side.
- Built responsive interfaces for desktop and mobile environments and iteratively refined the application throughout development.
- Deployed and maintained the production application on Vercel with GitHub-based automated deployments.

CORE ENGINEERING AREAS

Full-Stack Web Development • React & Next.js Development • REST API & Backend Integration • Authentication & Authorization • PostgreSQL & Relational Database Design • Supabase & Row Level Security • Responsive UI Engineering • Real-Time Application Architecture • AI Application Integration • Debugging & Refactoring • Git-Based Development & Deployment

EDUCATION

North-West University — B.Sc. Computer Science & Mathematics

Expected Graduation: 2028

Relevant coursework: Programming, Mathematics, Analytical Problem Solving, Physics
